CODE: 242

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - Example: 9 + (1 + 7) = (9 + 1) + 7

Liam (he/him) Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books. Strategy A 27 + 2325 + 225 25 + 2550

CJ (they/them)

2nd Grade Student Descriptions

CJ is a gender fluid white child who speaks English as their first language. They have no identified disabilities, and they do not receive free or reduced lunch. They have a history of high success and average participation during math lessons. They also love to draw and paint.

Oliver (he/him)

Oliver is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding success and average his bike.

Mateo (he/him)

Mateo is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no identified disabilities. He receives free or reduced lunch. He has a history of high participation during math lessons. He also likes to play the guitar.

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

Strategy B

- 40 + 3 = 43
- First I added 20 and 20 to get 40.
- Then I added 3 more to get 43.

Mason (he/him)

Mason is a white boy who speaks English as his first language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing.

Camille (she/her)

Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also does karate.

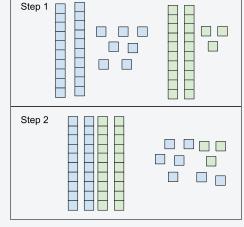

Valentina (she/her)

Valentina is a Latina girl who speaks English as her first speech impairment (stuttering). She does not receive free or reduced lunch. identified disabilities. He She has a history of average success and low participation enjoys spending time in nature.

Alejandro (he/him)

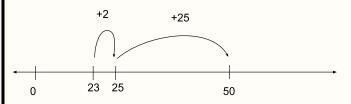

Aleiandro is a Latino boy who speaks Spanish as his first language. She has an IEP for language. He is an EL student who speaks English at a beginner level. He has no receives free or reduced lunch. He has a history of low during math lessons. She also success and low participation during math lessons. He also loves to play Minecraft.

Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.

Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

Adriel (he/him) Ava (she/her) Angel (she/her) Jada (she/her) Ava is a white girl who speaks Angel is a Black girl who Adriel is an Indigenous boy Jada is a Black girl who English as her first language. speaks English as her first who speaks English as his speaks English as her first She has no identified language. She has no first language. He has no language. She has no disabilities. She receives free identified disabilities, and she identified disabilities, and he identified disabilities, and she or reduced lunch. She has a does not receive free or receives free or reduced does not receive free or history of low success and low reduced lunch. She has a lunch. He has a history of reduced lunch. She has a participation during math history of low success and low average success and low history of high success and lessons. She also loves participation during math participation during math high participation during math lessons. She also enjoys lessons. He also loves to play lessons. She also plays on a gardening. softball team. making origami. soccer. Strategy E Strategy F First, I added 7 and 3 23 + 27 27 to get 10. I put a zero I made it 23 + 27 because that's easier for + 23 under the 7. me to think about. 23 + (2 + 25)50 Then I put the 1 up Then I broke the 27 into 2 and 25. (23 + 2) = 25above the 2. Last I Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Jackie (she/they) Daniela (she/her) Grace (she/her) Carter (he/him) Jackie is a white transgender Daniela is a Latina girl who Grace is an Asian girl who Carter is a Black boy who girl who speaks English as speaks English as her first speaks English as her first speaks English as his first her first language. She has no language. She has no language. She has an IEP for Elanguage. He has no identified disabilities. She identified disabilities, and she dvslexia. She does not identified disabilities, and he receives free or reduced does not receive free or receive free or reduced lunch. receives free or reduced She has a history of low lunch. She has a history of lunch. He has a history of reduced lunch. She has a average success and low history of average success success and average average success and little to participation during math and low participation during participation during math no participation during math lessons. She also loves math lessons. She also loves lessons. She also plays lessons. He also loves to cook animals. to dance. basketball. and bake. Strategy G Strategy H 1. I made 27 and 23 with the blocks. 27 + 23• First I added 20 and 20 to get 40. 2. I pulled 2 apart from the Then I added 7 and 3 to get 10. 20 + 20 = 4027 to make 25. • Then I added 40 and 10 to get 50. 3. I put the 2 with the 23 to 7 + 3 = 10make 25. That makes 25 + 25 which is 50. 40 + 10 = 50
