CODE: 172

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - \cdot Example: 9 + (1 + 7) = (9 + 1) + 7

Mason (he/him) Mason is a white boy who speaks English as his first language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing. Strategy A 27 + 23 25 + 2 • I broke th • Then I ac • Then I kn because

Mateo (he/him)

2nd Grade Student Descriptions

Mateo is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no identified disabilities. He receives free or reduced lunch. He has a history of high success and average participation during math lessons. He also likes to play the guitar.

Jada (she/her)

Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.

Valentina (she/her)

Valentina is a Latina girl who speaks English as her first language. She has an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also enjoys spending time in nature.

50

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

Strategy B

- 40 + 3 = 43
- First I added 20 and 20 to get 40.
- Then I added 3 more to get 43.

Grace (she/her)

Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not receive free or reduced lunch. She has a history of low success and average participation during math lessons. She also plays basketball.

Ava (she/her)

Ava is a white girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of low success and low participation during math lessons. She also loves gardening.

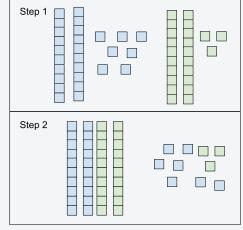

Liam (he/him)

Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.

Daniela (she/her)

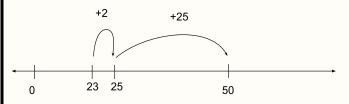

Daniela is a Latina girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves to dance.

Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.

Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

CJ (they/them) Oliver (he/him) Angel (she/her) Carter (he/him) Oliver is a white boy who CJ is a gender fluid white Angel is a Black girl who Carter is a Black boy who child who speaks English as speaks English as her first speaks English as his first speaks English as his first their first language. They have language. She has no language. He has no language. He has no no identified disabilities, and identified disabilities, and she identified disabilities, and he identified disabilities, and he they do not receive free or does not receive free or receives free or reduced does not receive free or reduced lunch. They have a reduced lunch. She has a lunch. He has a history of reduced lunch. He has a history of high success and history of low success and low average success and little to history of high success and average participation during high participation during math participation during math no participation during math math lessons. They also love lessons. She also enjoys lessons. He also loves to cook lessons. He also enjoys riding his bike. to draw and paint. and bake. making origami. Strategy E Strategy F First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 me to think about. Then I put the 1 up 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Alejandro (he/him) Adriel (he/him) Camille (she/her) Jackie (she/they) Alejandro is a Latino boy who Adriel is an Indigenous boy Camille is a white girl who Jackie is a white transgender speaks Spanish as his first who speaks English as his speaks French as her first girl who speaks English as language. He is an EL student first language. He has no her first language. She has no language. She is an EL who speaks English at a identified disabilities, and he student who speaks English identified disabilities. She beginner level. He has no receives free or reduced at an advanced level. She has receives free or reduced lunch. She has a history of identified disabilities. He lunch. He has a history of no identified disabilities, and receives free or reduced average success and low she does not receive free or average success and low reduced lunch. She has a lunch. He has a history of low participation during math participation during math success and low participation lessons. He also loves to play history of high success and lessons. She also loves during math lessons. He also high participation during math soccer. animals. loves to play Minecraft. lessons. She also does karate. Strategy G Strategy H 1. I made 27 and 23 with the blocks. 27 + 23• First I added 20 and 20 to get 40. 2. I pulled 2 apart from the Then I added 7 and 3 to get 10. 20 + 20 = 4027 to make 25. • Then I added 40 and 10 to get 50. 3. I put the 2 with the 23 to 7 + 3 = 10make 25. That makes 25 + 25 which is 50. 40 + 10 = 50
