**CODE: 200** 

## **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

## **The Problem**

27 + 23

## **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - Example: 9 + (1 + 7) = (9 + 1) + 7

## **2nd Grade Student Descriptions** Mateo (he/him) Daniela (she/her) Jackie (she/they) Jada (she/her) Jackie is a white transgender Mateo is a Latino boy who Daniela is a Latina girl who Jada is a Black girl who speaks Spanish as his first speaks English as her first girl who speaks English as speaks English as her first language. He is an EL student language. She has no her first language. She has no language. She has no who speaks English at an identified disabilities, and she identified disabilities. She identified disabilities, and she intermediate level. He has no does not receive free or receives free or reduced does not receive free or identified disabilities. He reduced lunch. She has a lunch. She has a history of reduced lunch. She has a receives free or reduced history of average success average success and low history of high success and lunch. He has a history of high and low participation during participation during math high participation during math success and average math lessons. She also loves lessons. She also loves lessons. She also plays on a animals softball team. participation during math to dance. lessons. He also likes to play the guitar. Strategy A Strategy B 27 + 23 • I broke the 27 into 25 and 2. First I added 20 and 20 to get 40. Then I added the 2 and 23 to make 25. Then I added 3 more to get 43. 25 + 2Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents. 25 40 + 3 = 4325 + 2550 Alejandro (he/him) Ava (she/her) Angel (she/her) Oliver (he/him) Aleiandro is a Latino boy who Ava is a white girl who speaks Angel is a Black girl who Oliver is a white boy who speaks Spanish as his first English as her first language. speaks English as her first speaks English as his first language. He is an EL student She has no identified language. She has no language. He has no who speaks English at a disabilities. She receives free identified disabilities, and she identified disabilities, and he beginner level. He has no or reduced lunch. She has a does not receive free or does not receive free or identified disabilities. He history of low success and low reduced lunch. She has a reduced lunch. He has a receives free or reduced participation during math history of low success and low history of high success and lunch. He has a history of low lessons. She also loves participation during math high participation during math success and low participation gardening. lessons. She also enjoys lessons. He also enjoys riding during math lessons. He also making origami. his bike. loves to play Minecraft. Strategy C Strategy D +2 Step 1 1. I made 27 and 23 +25 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, 23 0 50 which is 50 I started at 23. Step 2 Then I took 2 from the 27 to make a jump of 2. That makes 25. Then I only needed to add 25 more, so I made another jump

and got 50.

Liam (he/him)	Camille (she/her)	Mason (he/him)	CJ (they/them)
Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.	Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also does karate.	Mason is a white boy who speaks English as his first language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing.	CJ is a gender fluid white child who speaks English as their first language. They have no identified disabilities, and they do not receive free or reduced lunch. They have a history of high success and average participation during math lessons. They also love to draw and paint.
Strategy E  23 + 27  23 + (2 + 25)  (23 + 2) = 25  • I made it 23 + 27 because that's easier for me to think about. • Then I broke the 27 into 2 and 25. • Then I combined the 2 with the 23, and I got 25.		• First, I added 7 and 3 to get 10. I put a zero under the 7. • Then I put the 1 up above the 2. Last I added 1 + 2 + 2 to get 50.	
Carter (he/him)	Valentina (she/her)	Grace (she/her)	Adriel (he/him)
Carter is a Black boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook and bake.	Valentina is a Latina girl who speaks English as her first language. She has an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also enjoys spending time in nature.	dyslexia. She does not	Adriel is an Indigenous boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and low participation during math lessons. He also loves to play soccer.
