CODE: 140

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - \cdot Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions Mateo (he/him) CJ (they/them) Mateo is a Latino boy who CJ is a gender fluid white speaks Spanish as his first child who speaks English as language. He is an EL student their first language. They have who speaks English at an no identified disabilities, and intermediate level. He has no they do not receive free or identified disabilities. He reduced lunch. They have a receives free or reduced history of high success and lunch. He has a history of high average participation during

Daniela is a Latina girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves math lessons. They also love to draw and paint. to dance.

Adriel is an Indigenous boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and low participation during math lessons. He also loves to play soccer.

Adriel (he/him)

the guitar. Strategy A

success and average

participation during math

lessons. He also likes to play

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

Strategy B

40 + 3 = 43

- First I added 20 and 20 to get 40. Then I added 3 more to get 43.

25 + 25

50

Angel (she/her)

Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low history of average success participation during math lessons. She also enjoys making origami.

Liam (he/him)

Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a and average participation during math lessons. He also loves comic books.

Grace (she/her)

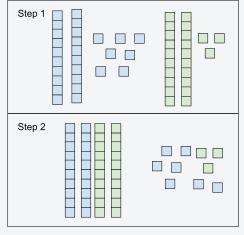

Daniela (she/her)

Grace is an Asian girl who speaks English as her first language. She has an IEP for language. He has no dvslexia. She does not receive free or reduced lunch. Freceives free or reduced She has a history of low success and average participation during math lessons. She also plays basketball.

Carter (he/him)

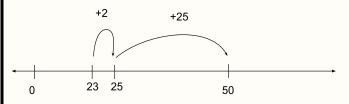

Carter is a Black boy who speaks English as his first identified disabilities, and he lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook and bake.

Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.

Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

Alejandro (he/him) Valentina (she/her) Jada (she/her) Jackie (she/they) Valentina is a Latina girl who Jada is a Black girl who Jackie is a white transgender Alejandro is a Latino boy who speaks English as her first speaks English as her first girl who speaks English as speaks Spanish as his first language. She has an IEP for her first language. She has no language. He is an EL student language. She has no identified disabilities. She speech impairment identified disabilities, and she who speaks English at a (stuttering). She does not does not receive free or receives free or reduced beginner level. He has no receive free or reduced lunch. reduced lunch. She has a lunch. She has a history of identified disabilities. He receives free or reduced She has a history of average history of high success and average success and low success and low participation lunch. He has a history of low high participation during math participation during math during math lessons. She also lessons. She also plays on a lessons. She also loves success and low participation animals. enjoys spending time in softball team. during math lessons. He also loves to play Minecraft. nature. Strategy E Strategy F First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get 50. Camille (she/her) Oliver (he/him) Ava (she/her) Mason (he/him) Camille is a white girl who Oliver is a white boy who Ava is a white girl who speaks Mason is a white boy who speaks French as her first speaks English as his first English as her first language. speaks English as his first language. She is an EL language. He has no She has no identified language. He is on an IEP for student who speaks English identified disabilities, and he disabilities. She receives free severe ADHD. He receives at an advanced level. She has does not receive free or or reduced lunch. She has a free or reduced lunch. He has no identified disabilities, and reduced lunch. He has a history of low success and low a history of high success and she does not receive free or low participation during math history of high success and participation during math reduced lunch. She has a high participation during math lessons. She also loves lessons. He also enjoys history of high success and lessons. He also enjoys riding gardening. singing. high participation during math his bike. lessons. She also does karate. Strategy G Strategy H 1. 1. I made 27 and 23 with the blocks. 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23• First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
