CODE: 219

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions			
Ava (she/her)	Grace (she/her)	Valentina (she/her)	Liam (he/him)
Ava is a white girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of low success and low participation during math lessons. She also loves gardening.	Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not receive free or reduced lunch. She has a history of low success and average participation during math lessons. She also plays basketball.	Valentina is a Latina girl who speaks English as her first language. She has an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also enjoys spending time in nature.	Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.
Strategy A		Strategy B	
 27 + 23 25 + 2 Then I added the 2 and 23 to make 25. Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents. 		27 + 23 20 20 3 • First I added 20 and 20 to get 40. • Then I added 3 more to get 43. 40 + 3 = 43	
Oliver (he/him)	Adriel (he/him)	Jada (she/her)	Angel (she/her)
Oliver is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike.	Adriel is an Indigenous boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and low participation during math lessons. He also loves to play soccer.	Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.	Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.
Strategy C		Strategy D	
Step 1	1. I made 27 and 23 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.	+2 +25	
		 That makes 25. Then I only needed to add 25 more, so I made another jump and got 50. 	

CJ (they/them) Daniela (she/her) Camille (she/her) Jackie (she/they) CJ is a gender fluid white Daniela is a Latina girl who Camille is a white girl who Jackie is a white transgender speaks English as her first speaks French as her first child who speaks English as girl who speaks English as language. She has no their first language. They have her first language. She has no language. She is an EL identified disabilities. She identified disabilities, and she student who speaks English no identified disabilities, and does not receive free or at an advanced level. She has they do not receive free or receives free or reduced reduced lunch. She has a no identified disabilities, and reduced lunch. They have a lunch. She has a history of she does not receive free or history of average success history of high success and average success and low and low participation during average participation during reduced lunch. She has a participation during math math lessons. She also loves history of high success and math lessons. They also love lessons. She also loves to dance. high participation during math to draw and paint. animals. lessons. She also does karate. Strategy F Strategy E First, I added 7 and 3 23 + 27 27 to get 10. I put a zero • I made it 23 + 27 because that's easier for + 23 under the 7. me to think about 23 + (2 + 25)50 • Then I put the 1 up Then I broke the 27 into 2 and 25. (23 + 2) = 25above the 2. Last I Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Carter (he/him) Alejandro (he/him) Mateo (he/him) Mason (he/him) Aleiandro is a Latino boy who Mason is a white boy who Carter is a Black boy who Mateo is a Latino boy who speaks English as his first speaks Spanish as his first speaks Spanish as his first speaks English as his first language. He has no language. He is an EL student language. He is an EL student language. He is on an IEP for identified disabilities, and he who speaks English at an who speaks English at a severe ADHD. He receives receives free or reduced intermediate level. He has no beginner level. He has no free or reduced lunch. He has identified disabilities. He lunch. He has a history of identified disabilities. He a history of high success and receives free or reduced low participation during math average success and little to receives free or reduced no participation during math lunch. He has a history of high lunch. He has a history of low lessons. He also enjoys success and low participation lessons. He also loves to cook success and average singing. participation during math and bake. during math lessons. He also lessons. He also likes to play loves to play Minecraft. the guitar. Strategy G Strategy H 1. 1. I made 27 and 23 with the blocks. 27 + 23 First I added 20 and 20 to get 40. 2. I pulled 2 apart from the Then I added 7 and 3 to get 10. 20 + 20 = 4027 to make 25. • Then I added 40 and 10 to get 50. 3. I put the 2 with the 23 to 7 + 3 = 10make 25. That makes 25 + 25 which is 50. 40 + 10 = 50
