CODE: 147

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - \cdot Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions			
Liam (he/him)	Daniela (she/her)	Ava (she/her)	Carter (he/him)
Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.	Daniela is a Latina girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves to dance.	English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a	Carter is a Black boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook and bake.
Strategy A		Strategy B	
 I broke the 27 into 25 and 2. Then I added the 2 and 23 to make 25. Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents. 		 First I added 20 and 20 to get 40. Then I added 3 more to get 43. 40 40 + 3 = 43 	
lookie (obe/they)	Mason (be/bim)	Angel (che/hor)	lada (aba/bar)
Jackie (she/they) Jackie is a white transgender girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves animals.	Mason (he/him) Mason is a white boy who speaks English as his first language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing.	Angel (she/her) Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.	Jada (she/her) Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.
Strategy C		Strategy D	
Step 1	1. I made 27 and 23 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.	+2 +25 	
Step 2		Then I took 2 from the 27 to rThat makes 25.	make a jump of 2.

Oliver (he/him) Adriel (he/him) Camille (she/her) Valentina (she/her) Oliver is a white boy who Adriel is an Indigenous boy Camille is a white girl who Valentina is a Latina girl who who speaks English as his speaks French as her first speaks English as his first speaks English as her first language. She has an IEP for first language. He has no language. She is an EL language. He has no identified disabilities, and he student who speaks English identified disabilities, and he speech impairment receives free or reduced at an advanced level. She has does not receive free or (stuttering). She does not lunch. He has a history of no identified disabilities, and reduced lunch. He has a receive free or reduced lunch. she does not receive free or average success and low history of high success and She has a history of average success and low participation participation during math reduced lunch. She has a high participation during math lessons. He also loves to play history of high success and lessons. He also enjoys riding iduring math lessons. She also high participation during math his bike. enjoys spending time in soccer. lessons. She also does nature. karate. Strategy F Strategy E First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 me to think about. Then I put the 1 up 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Mateo (he/him) Alejandro (he/him) CJ (they/them) Grace (she/her) CJ is a gender fluid white Aleiandro is a Latino bov who Mateo is a Latino boy who Grace is an Asian girl who speaks Spanish as his first child who speaks English as speaks English as her first speaks Spanish as his first language. He is an EL student their first language. They have language. He is an EL student language. She has an IEP for dyslexia. She does not no identified disabilities, and who speaks English at an who speaks English at a intermediate level. He has no they do not receive free or beginner level. He has no receive free or reduced lunch. reduced lunch. They have a identified disabilities. He identified disabilities. He She has a history of low receives free or reduced history of high success and receives free or reduced success and average lunch. He has a history of high average participation during lunch. He has a history of low participation during math math lessons. They also love success and average success and low participation lessons. She also plays participation during math to draw and paint. during math lessons. He also basketball. lessons. He also likes to play loves to play Minecraft. the guitar. Strategy G Strategy H 1. 1. I made 27 and 23 with the blocks. 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
