**CODE: 116** 

## **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

## **The Problem**

27 + 23

## **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- · You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - $\cdot$  Example: 9 + (1 + 7) = (9 + 1) + 7

| 2nd Grade Student Descriptions  |   |  |  |
|---|---|--|--|
| Liam (he/him)   | Grace (she/her)   | Adriel (he/him)  | Mateo (he/him)   |
| Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.     | Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not receive free or reduced lunch. She has a history of low success and average participation during math lessons. She also plays basketball.  | Adriel is an Indigenous boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and low participation during math lessons. He also loves to play soccer.   | Mateo is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no identified disabilities. He receives free or reduced lunch. He has a history of high success and average participation during math lessons. He also likes to play the guitar. |

| <ul> <li>27 + 23</li> <li>25 + 2</li> <li>Then I added the 2 and 23 to make 25.</li> <li>Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.</li> </ul>  |   | 27 + 23<br>20 20<br>3  • First I added 20 and 20 to get 40.<br>• Then I added 3 more to get 43.<br>40 + 3 = 43   |  |
| Carter (he/him)   | Alejandro (he/him)  | Oliver (he/him)  | Ava (she/her)  |
| Carter is a Black boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook and bake. | Alejandro is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at a beginner level. He has no identified disabilities. He receives free or reduced lunch. He has a history of low success and low participation during math lessons. He also loves to play Minecraft. | Oliver is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike. | Ava is a white girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of low success and low participation during math lessons. She also loves gardening.  |
| Strategy C  |   | Strategy D   |  |
| Step 1  | 1. I made 27 and 23 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.  | +2 +25<br>   |  |
| Step 2  |   | <ul> <li>I started at 23.</li> <li>Then I took 2 from the 27 to make a jump of 2.</li> <li>That makes 25.</li> <li>Then I only needed to add 25 more, so I made another jump and got 50.</li> </ul>  |  |

## Angel (she/her) Camille (she/her) Valentina (she/her) Jada (she/her) Angel is a Black girl who Camille is a white girl who Valentina is a Latina girl who Jada is a Black girl who speaks English as her first speaks French as her first speaks English as her first speaks English as her first language. She has no language. She has an IEP for language. She has no language. She is an EL identified disabilities, and she student who speaks English speech impairment identified disabilities, and she does not receive free or at an advanced level. She has (stuttering). She does not does not receive free or reduced lunch. She has a no identified disabilities, and receive free or reduced lunch. reduced lunch. She has a history of low success and low she does not receive free or She has a history of average history of high success and success and low participation participation during math reduced lunch. She has a high participation during math lessons. She also eniovs history of high success and during math lessons. She also lessons. She also plays on a making origami. high participation during math enjoys spending time in softball team. lessons. She also does nature. karate. Strategy E Strategy F First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Daniela (she/her) Mason (he/him) Jackie (she/they) CJ (they/them) Daniela is a Latina girl who Mason is a white boy who Jackie is a white transgender CJ is a gender fluid white girl who speaks English as child who speaks English as speaks English as her first speaks English as his first language. She has no language. He is on an IEP for her first language. She has no their first language. They have identified disabilities, and she identified disabilities. She no identified disabilities, and severe ADHD. He receives does not receive free or free or reduced lunch. He has receives free or reduced they do not receive free or reduced lunch. She has a a history of high success and reduced lunch. They have a lunch. She has a history of history of average success low participation during math average success and low history of high success and and low participation during lessons. He also enjoys participation during math average participation during math lessons. They also love math lessons. She also loves singing. lessons. She also loves to dance. animals. to draw and paint. Strategy G Strategy H 1. I made 27 and 23 with the blocks 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23• First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
