**CODE: 74** 

## **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

## **The Problem**

27 + 23

## **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - $\cdot$  Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions			
Angel (she/her)	Camille (she/her)	Ava (she/her)	Mateo (he/him)
Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.	Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also does karate.	Ava is a white girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of low success and low participation during math lessons. She also loves gardening.	speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no
Strategy A	ategy A Strategy B		
<ul> <li>I broke the 27 into 25 and 2.</li> <li>Then I added the 2 and 23 to make 25.</li> <li>Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.</li> </ul>		• First I added 20 and 20 to get 40. • Then I added 3 more to get 43.  40  40 + 3 = 43	
Alejandro (he/him)	Liam (he/him)	Grace (she/her)	Jackie (she/they)
speaks Spanish as his first language. He is an EL student who speaks English at a beginner level. He has no identified disabilities. He receives free or reduced lunch. He has a history of low success and low participation	Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.	Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not receive free or reduced lunch. She has a history of low success and average participation during math lessons. She also plays basketball.	Jackie is a white transgender girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves animals.
Strategy C Strategy D			
Step 1	1. I made 27 and 23 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.	+2 +25  0 23 25 50  • I started at 23. • Then I took 2 from the 27 to make a jump of 2. • That makes 25. • Then I only needed to add 25 more, so I made another jump and got 50.	

## Valentina (she/her) Daniela (she/her) Mason (he/him) Adriel (he/him) Mason is a white boy who Daniela is a Latina girl who Valentina is a Latina girl who Adriel is an Indigenous boy speaks English as her first speaks English as his first speaks English as her first who speaks English as his language. She has an IEP for first language. He has no language. She has no language. He is on an IEP for identified disabilities, and she severe ADHD. He receives speech impairment identified disabilities, and he does not receive free or free or reduced lunch. He has (stuttering). She does not receives free or reduced reduced lunch. She has a a history of high success and receive free or reduced lunch. lunch. He has a history of history of average success low participation during math She has a history of average average success and low success and low participation and low participation during lessons. He also enjoys participation during math math lessons. She also loves during math lessons. She also lessons. He also loves to play singing. to dance. enjoys spending time in soccer. nature. Strategy F Strategy E First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get 50. Jada (she/her) Oliver (he/him) Carter (he/him) CJ (they/them) Jada is a Black girl who Oliver is a white boy who Carter is a Black boy who CJ is a gender fluid white speaks English as her first speaks English as his first speaks English as his first child who speaks English as language. She has no language. He has no language. He has no their first language. They have identified disabilities, and she identified disabilities, and he identified disabilities, and he no identified disabilities, and does not receive free or does not receive free or receives free or reduced they do not receive free or reduced lunch. She has a reduced lunch. He has a lunch. He has a history of reduced lunch. They have a average success and little to history of high success and history of high success and history of high success and high participation during math no participation during math average participation during high participation during math lessons. She also plays on a lessons. He also enjoys riding lessons. He also loves to cook math lessons. They also love softball team. and bake. to draw and paint. Strategy G Strategy H 1. I made 27 and 23 with 1. the blocks 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23 First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
