CODE: 160

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - \cdot Example: 9 + (1 + 7) = (9 + 1) + 7

CJ (they/them) CJ is a gender fluid white child who speaks English as their first language. They have language. He has no no identified disabilities, and they do not receive free or reduced lunch. They have a history of high success and average participation during math lessons. They also love to draw and paint. Strategy A 27 + 2325 + 225 25 + 2550

Oliver (he/him)

Oliver is a white boy who speaks English as his first identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike.

Liam (he/him)

Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.

Camille (she/her)

Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also does karate.

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

Strategy B

2nd Grade Student Descriptions

- 40 + 3 = 43
- First I added 20 and 20 to get 40.
- Then I added 3 more to get 43.

Grace (she/her)

Grace is an Asian girl who speaks English as her first language. She has an IEP for dvslexia. She does not receive free or reduced lunch. receives free or reduced She has a history of low success and average participation during math lessons. She also plays basketball.

Jackie (she/they)

Jackie is a white transgender girl who speaks English as her first language. She has no identified disabilities. She lunch. She has a history of average success and low participation during math lessons. She also loves animals.

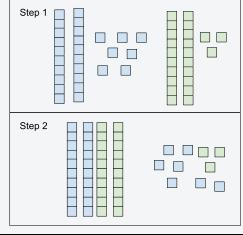

Valentina (she/her)

Valentina is a Latina girl who speaks English as her first language. She has an IEP for language. She has no speech impairment (stuttering). She does not receive free or reduced lunch. reduced lunch. She has a She has a history of average success and low participation during math lessons. She also lessons. She also enjoys enjoys spending time in nature.

Angel (she/her)

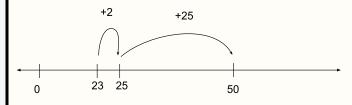

Angel is a Black girl who speaks English as her first identified disabilities, and she does not receive free or history of low success and low participation during math making origami.

Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50

Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

Mateo (he/him) Alejandro (he/him) Jada (she/her) Mason (he/him) Mateo is a Latino boy who Alejandro is a Latino boy who Jada is a Black girl who Mason is a white boy who speaks Spanish as his first speaks Spanish as his first speaks English as her first speaks English as his first language. She has no language. He is on an IEP for language. He is an EL student language. He is an EL student who speaks English at an who speaks English at a identified disabilities, and she severe ADHD. He receives intermediate level. He has no beginner level. He has no does not receive free or free or reduced lunch. He has identified disabilities. He identified disabilities. He reduced lunch. She has a a history of high success and receives free or reduced receives free or reduced history of high success and low participation during math lunch. He has a history of high lunch. He has a history of low high participation during math lessons. He also enjoys success and average success and low participation lessons. She also plays on a singing. participation during math during math lessons. He also softball team. lessons. He also likes to play loves to play Minecraft. Strategy E Strategy F First, I added 7 and 3 27 to get 10. I put a zero 23 + 27+ 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Carter (he/him) Adriel (he/him) Daniela (she/her) Ava (she/her) Adriel is an Indigenous boy Daniela is a Latina girl who Ava is a white girl who speaks Carter is a Black boy who speaks English as his first who speaks English as his speaks English as her first English as her first language. She has no identified language. He has no first language. He has no language. She has no disabilities. She receives free identified disabilities, and he identified disabilities, and he identified disabilities, and she receives free or reduced receives free or reduced does not receive free or or reduced lunch. She has a reduced lunch. She has a history of low success and low lunch. He has a history of lunch. He has a history of average success and low history of average success participation during math average success and little to no participation during math participation during math and low participation during lessons. She also loves math lessons. She also loves lessons. He also loves to cook lessons. He also loves to play gardening. soccer. and bake. to dance. Strategy G Strategy H 1. I made 27 and 23 with the blocks 27 + 23• First I added 20 and 20 to get 40. 2. I pulled 2 apart from the Then I added 7 and 3 to get 10. 20 + 20 = 4027 to make 25. • Then I added 40 and 10 to get 50. 3. I put the 2 with the 23 to 7 + 3 = 10make 25. That makes 25 + 25 which is 50. 40 + 10 = 50
