CODE: 134

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - Example: 9 + (1 + 7) = (9 + 1) + 7

Carter (he/him) Carter is a Black boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook during math lessons. He also and bake. loves comic books. Strategy A 25 + 225 25 + 2550 Oliver (he/him) Oliver is a white boy who

2nd Grade Student Descriptions

Liam (he/him) Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation

Camille (she/her)

Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has intermediate level. He has no no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also does karate.

Mateo is a Latino boy who

Mateo (he/him)

speaks Spanish as his first language. He is an EL student who speaks English at an identified disabilities. He receives free or reduced lunch. He has a history of high success and average participation during math lessons. He also likes to play the guitar.

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

Strategy B

40 + 3 = 43

- First I added 20 and 20 to get 40.
- Then I added 3 more to get 43.

speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike.

Jada (she/her)

Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.

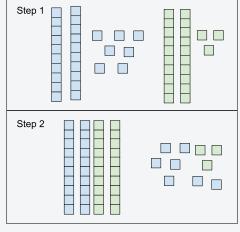

Adriel (he/him)

Adriel is an Indigenous boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and low participation during math soccer.

Valentina (she/her)

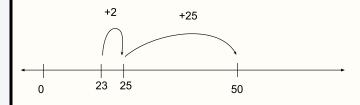

Valentina is a Latina girl who speaks English as her first language. She has an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation lessons. He also loves to play iduring math lessons. She also enjoys spending time in nature.

Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50

Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

Alejandro (he/him) Jackie (she/they) Daniela (she/her) Angel (she/her) Alejandro is a Latino boy who Jackie is a white transgender Daniela is a Latina girl who Angel is a Black girl who speaks Spanish as his first girl who speaks English as speaks English as her first speaks English as her first language. He is an EL student her first language. She has no language. She has no language. She has no who speaks English at a identified disabilities. She identified disabilities, and she identified disabilities, and she beginner level. He has no receives free or reduced does not receive free or does not receive free or identified disabilities. He lunch. She has a history of reduced lunch. She has a reduced lunch. She has a receives free or reduced average success and low history of average success history of low success and low lunch. He has a history of low participation during math and low participation during participation during math success and low participation lessons. She also loves math lessons. She also loves lessons. She also enjoys during math lessons. He also animals. to dance. making origami. loves to play Minecraft. Strategy E Strategy F First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get 50. Grace (she/her) Mason (he/him) CJ (they/them) Ava (she/her) CJ is a gender fluid white Grace is an Asian girl who Mason is a white boy who Ava is a white girl who speaks English as her first language. speaks English as her first speaks English as his first child who speaks English as language. She has an IEP for language. He is on an IEP for their first language. They have She has no identified disabilities. She receives free dyslexia. She does not severe ADHD. He receives no identified disabilities, and receive free or reduced lunch. free or reduced lunch. He has they do not receive free or or reduced lunch. She has a She has a history of low a history of high success and reduced lunch. They have a history of low success and low low participation during math history of high success and participation during math success and average participation during math average participation during lessons. She also loves lessons. He also enjoys lessons. She also plays singing. math lessons. They also love gardening. basketball. to draw and paint. Strategy G Strategy H 1. 1. I made 27 and 23 with the blocks 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23 First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
