**CODE: 211** 

## **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

## **The Problem**

27 + 23

## **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions			
CJ (they/them)	Liam (he/him)	Valentina (she/her)	Jackie (she/they)
CJ is a gender fluid white child who speaks English as their first language. They have no identified disabilities, and they do not receive free or reduced lunch. They have a history of high success and average participation during math lessons. They also love to draw and paint.	Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.	Valentina is a Latina girl who speaks English as her first language. She has an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also enjoys spending time in nature.	Jackie is a white transgender girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves animals.
Strategy A  27 + 23 25 + 2  • I broke the 27 into 25 and 2. • Then I added the 2 and 23 to make 25. • Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.  25 + 25  50		Strategy B  27 + 23 20 20 3  • First I added 20 and 20 to get 40. • Then I added 3 more to get 43.  40  40 + 3 = 43	
Carter (he/him)	Mateo (he/him)	Oliver (he/him)	Mason (he/him)
no participation during math lessons. He also loves to cook and bake.	Mateo is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no identified disabilities. He receives free or reduced lunch. He has a history of high success and average participation during math lessons. He also likes to play the guitar.	Oliver is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike.	Mason is a white boy who speaks English as his first language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing.
Strategy C		Strategy D	
Step 1	1. I made 27 and 23 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.	+2 +25  0 23 25 50  I started at 23. Then I took 2 from the 27 to make a jump of 2. That makes 25. Then I only needed to add 25 more, so I made another jump and got 50.	

## Camille (she/her) Ava (she/her) Angel (she/her) Daniela (she/her) Camille is a white girl who Ava is a white girl who speaks Angel is a Black girl who Daniela is a Latina girl who speaks French as her first English as her first language. speaks English as her first speaks English as her first She has no identified language. She is an EL language. She has no language. She has no student who speaks English disabilities. She receives free identified disabilities, and she identified disabilities, and she at an advanced level. She has or reduced lunch. She has a does not receive free or does not receive free or no identified disabilities, and history of low success and low reduced lunch. She has a reduced lunch. She has a she does not receive free or participation during math history of low success and low history of average success lessons. She also loves reduced lunch. She has a participation during math and low participation during history of high success and lessons. She also enjoys math lessons. She also loves gardening. high participation during math making origami. to dance. lessons. She also does karate. Strategy E Strategy F First, I added 7 and 3 27 to get 10. I put a zero 23 + 27+ 23 under the 7. I made it 23 + 27 because that's easier for 50 me to think about. Then I put the 1 up 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Jada (she/her) Adriel (he/him) Grace (she/her) Alejandro (he/him) Jada is a Black girl who Adriel is an Indigenous boy Grace is an Asian girl who Aleiandro is a Latino boy who speaks English as her first who speaks English as his speaks English as her first speaks Spanish as his first language. She has no first language. He has no language. She has an IEP for language. He is an EL student identified disabilities, and she identified disabilities, and he dyslexia. She does not who speaks English at a does not receive free or receives free or reduced receive free or reduced lunch. beginner level. He has no reduced lunch. She has a lunch. He has a history of She has a history of low identified disabilities. He history of high success and average success and low success and average receives free or reduced high participation during math participation during math participation during math lunch. He has a history of low lessons. She also plays on a lessons. He also loves to play lessons. She also plays success and low participation softball team. soccer. basketball. during math lessons. He also loves to play Minecraft. Strategy G Strategy H 1. I made 27 and 23 with 1. the blocks. 27 + 23• First I added 20 and 20 to get 40. 2. I pulled 2 apart from the Then I added 7 and 3 to get 10. 20 + 20 = 4027 to make 25. • Then I added 40 and 10 to get 50. 3. I put the 2 with the 23 to 7 + 3 = 10make 25. That makes 25 + 25 which is 50. 40 + 10 = 50
