**CODE: 45** 

#### **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

#### The Problem

27 + 23

#### **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - Example: 9 + (1 + 7) = (9 + 1) + 7

#### **2nd Grade Student Descriptions** Grace (she/her) Alejandro (he/him) Jada (she/her) Alejandro is a Latino boy who

Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not receive free or reduced lunch. She has a history of low success and average participation during math lessons. She also plays basketball.

speaks Spanish as his first language. He is an EL student who speaks English at a beginner level. He has no identified disabilities. He receives free or reduced lunch. He has a history of low success and low participation during math lessons. He also loves to play Minecraft.

Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math

lessons. She also plays on a

Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also does karate.

Camille (she/her)

# Strategy A

25 + 25

50

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

# Strategy B

softball team.

- 40 + 3 = 43
- First I added 20 and 20 to get 40.
- Then I added 3 more to get 43.

#### Liam (he/him)

Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.

#### Angel (she/her)

Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.

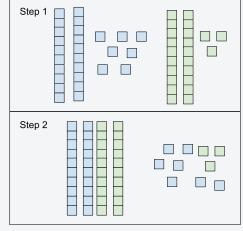

## Jackie (she/they)

Jackie is a white transgender girl who speaks English as identified disabilities. She receives free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves animals.

#### Mason (he/him)

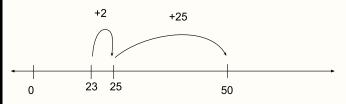

Mason is a white boy who speaks English as his first her first language. She has no language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing.

# Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.

# Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

#### Adriel (he/him) Mateo (he/him) Oliver (he/him) Daniela (she/her) Daniela is a Latina girl who Adriel is an Indigenous boy Mateo is a Latino boy who Oliver is a white boy who speaks English as her first who speaks English as his speaks Spanish as his first speaks English as his first language. She has no first language. He has no language. He is an EL student language. He has no identified disabilities, and she identified disabilities, and he who speaks English at an identified disabilities, and he does not receive free or receives free or reduced intermediate level. He has no does not receive free or reduced lunch. She has a lunch. He has a history of identified disabilities. He reduced lunch. He has a history of average success average success and low receives free or reduced history of high success and and low participation during lunch. He has a history of high high participation during math participation during math math lessons. She also loves lessons. He also loves to play success and average lessons. He also enjoys riding to dance. participation during math his bike. soccer. lessons. He also likes to play the guitar. Strategy F Strategy E First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Carter (he/him) Ava (she/her) Valentina (she/her) CJ (they/them) Ava is a white girl who speaks Valentina is a Latina girl who Carter is a Black boy who CJ is a gender fluid white child who speaks English as English as her first language. speaks English as her first speaks English as his first She has no identified language. She has an IEP for language. He has no their first language. They have disabilities. She receives free identified disabilities, and he no identified disabilities, and speech impairment or reduced lunch. She has a (stuttering). She does not receives free or reduced they do not receive free or history of low success and low receive free or reduced lunch. reduced lunch. They have a lunch. He has a history of participation during math average success and little to history of high success and She has a history of average success and low participation lessons. She also loves no participation during math average participation during lessons. He also loves to cook math lessons. They also love gardening. during math lessons. She also enjoys spending time in and bake. to draw and paint. nature. Strategy G Strategy H 1. I made 27 and 23 with 1. the blocks. 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23• First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
