CODE: 63

## **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

## **The Problem**

27 + 23

## **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - $\cdot$  Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions			
Daniela (she/her)	Alejandro (he/him)	Mason (he/him)	Jada (she/her)
Daniela is a Latina girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also loves to dance.	Alejandro is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at a beginner level. He has no identified disabilities. He receives free or reduced lunch. Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.
Strategy A		Strategy B	
<ul> <li>27 + 23</li> <li>25 + 2</li> <li>Then I added the 2 and 23 to make 25.</li> <li>Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.</li> </ul>		<ul> <li>First I added 20 and 20 to get 40.</li> <li>Then I added 3 more to get 43.</li> <li>40 + 3 = 43</li> </ul>	
Oliver (he/him)	Carter (he/him)	Mateo (he/him)	Liam (he/him)
Oliver is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike.	Carter is a Black boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook and bake.	Mateo is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no identified disabilities. He receives free or reduced lunch. He has a history of high success and average participation during math lessons. He also likes to play the guitar.	Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.
Strategy C Strategy D			
Step 1	1. I made 27 and 23 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50.	+2 +25  0 23 25 50  • I started at 23. • Then I took 2 from the 27 to make a jump of 2. • That makes 25. • Then I only needed to add 25 more, so I made another jump and got 50.	

## CJ (they/them) Camille (she/her) Jackie (she/they) Valentina (she/her) Jackie is a white transgender : CJ is a gender fluid white Camille is a white girl who Valentina is a Latina girl who girl who speaks English as child who speaks English as speaks French as her first speaks English as her first her first language. She has no their first language. They have language. She has an IEP for language. She is an EL identified disabilities. She no identified disabilities, and student who speaks English speech impairment receives free or reduced they do not receive free or at an advanced level. She has (stuttering). She does not lunch. She has a history of reduced lunch. They have a no identified disabilities, and receive free or reduced lunch. she does not receive free or average success and low history of high success and She has a history of average average participation during success and low participation participation during math reduced lunch. She has a during math lessons. She also lessons. She also loves math lessons. They also love history of high success and animals. to draw and paint. high participation during math enjoys spending time in lessons. She also does nature. karate. Strategy F Strategy E First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Adriel (he/him) Angel (she/her) Grace (she/her) Ava (she/her) Adriel is an Indigenous boy Angel is a Black girl who Grace is an Asian girl who Ava is a white girl who speaks who speaks English as his speaks English as her first speaks English as her first English as her first language. She has no identified first language. He has no language. She has no language. She has an IEP for disabilities. She receives free identified disabilities, and he identified disabilities, and she dyslexia. She does not receives free or reduced does not receive free or receive free or reduced lunch. or reduced lunch. She has a reduced lunch. She has a She has a history of low history of low success and low lunch. He has a history of average success and low history of low success and low success and average participation during math participation during math participation during math participation during math lessons. She also loves lessons. He also loves to play lessons. She also enjoys lessons. She also plays gardening. soccer. making origami. basketball. Strategy G Strategy H 1. I made 27 and 23 with the blocks 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23• First I added 20 and 20 to get 40. + 25 which is 50. • Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
