**CODE: 165** 

# **Background**

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

#### **The Problem**

27 + 23

# **Learning Goal**

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
  - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
  - $\cdot$  Example: 9 + (1 + 7) = (9 + 1) + 7

# **2nd Grade Student Descriptions**

#### CJ (they/them)

CJ is a gender fluid white child who speaks English as their first language. They have language. She has an IEP for no identified disabilities, and they do not receive free or reduced lunch. They have a history of high success and average participation during math lessons. They also love to draw and paint.

#### Valentina (she/her)

Valentina is a Latina girl who speaks English as her first speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also enjoys spending time in nature.

#### Camille (she/her)

Camille is a white girl who speaks French as her first language. She is an EL student who speaks English at an advanced level. She has receive free or reduced lunch. no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math basketball. lessons. She also does karate.

#### Grace (she/her)

Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not She has a history of low success and average participation during math lessons. She also plays

# Strategy A

- 25 + 25
- 50

- I broke the 27 into 25 and 2. Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

# Strategy B

40 + 3 = 43

- First I added 20 and 20 to get 40. Then I added 3 more to get 43.

#### Jada (she/her)

Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.

# Angel (she/her)

Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.

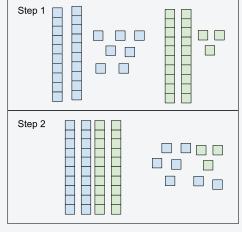

# Alejandro (he/him)

Aleiandro is a Latino boy who : Liam is a white boy who speaks Spanish as his first language. He is an EL student language. He has no who speaks English at a beginner level. He has no identified disabilities. He receives free or reduced lunch. He has a history of low success and low participation during math lessons. He also loves to play Minecraft.

#### Liam (he/him)

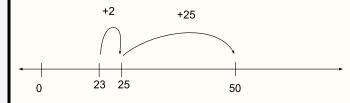

speaks English as his first identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.

#### Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50

# Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

#### Carter (he/him) Mateo (he/him) Jackie (she/they) Mason (he/him) Carter is a Black boy who Jackie is a white transgender Mateo is a Latino boy who Mason is a white boy who speaks English as his first girl who speaks English as speaks Spanish as his first speaks English as his first her first language. She has no language. He is an EL student language. He is on an IEP for language. He has no identified disabilities. She identified disabilities, and he who speaks English at an severe ADHD. He receives receives free or reduced receives free or reduced intermediate level. He has no free or reduced lunch. He has lunch. He has a history of lunch. She has a history of identified disabilities. He a history of high success and receives free or reduced average success and little to average success and low low participation during math lunch. He has a history of high lessons. He also enjoys no participation during math participation during math lessons. He also loves to cook lessons. She also loves success and average singing. and bake. animals. participation during math lessons. He also likes to play the guitar. Strategy F Strategy E First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get Ava (she/her) Adriel (he/him) Oliver (he/him) Daniela (she/her) Adriel is an Indigenous boy Oliver is a white boy who Ava is a white girl who speaks Daniela is a Latina girl who who speaks English as his speaks English as his first English as her first language. speaks English as her first first language. He has no language. He has no She has no identified language. She has no disabilities. She receives free identified disabilities, and he identified disabilities, and he identified disabilities, and she receives free or reduced does not receive free or or reduced lunch. She has a does not receive free or lunch. He has a history of reduced lunch. He has a history of low success and low reduced lunch. She has a average success and low participation during math history of average success history of high success and lessons. She also loves and low participation during participation during math high participation during math gardening. lessons. He also loves to play lessons. He also enjoys riding math lessons. She also loves soccer. his bike. to dance. Strategy G Strategy H 1. I made 27 and 23 with the blocks 27 + 23• First I added 20 and 20 to get 40. 2. I pulled 2 apart from the Then I added 7 and 3 to get 10. 20 + 20 = 4027 to make 25. • Then I added 40 and 10 to get 50. 3. I put the 2 with the 23 to 7 + 3 = 10make 25. That makes 25 + 25 which is 50. 40 + 10 = 50
