CODE: 58

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - \cdot Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions Jada (she/her) Angel (she/her) Angel is a Black girl who

Jada is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of high success and high participation during math lessons. She also plays on a softball team.

speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.

Mateo (he/him)

Mateo is a Latino boy who speaks Spanish as his first language. He is an EL student who speaks English at an intermediate level. He has no identified disabilities. He receives free or reduced lunch. He has a history of high participation during math success and average participation during math lessons. He also likes to play the guitar.

Jackie is a white transgender girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of average success and low lessons. She also loves animals

Jackie (she/they)

Strategy A

25 + 25

50

- I broke the 27 into 25 and 2.
- Then I added the 2 and 23 to make 25.
- Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents.

Strategy B

- 40 + 3 = 43
- First I added 20 and 20 to get 40.
- Then I added 3 more to get 43.

Adriel (he/him)

Adriel is an Indigenous boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and low participation during math lessons. He also loves to play soccer.

Oliver (he/him)

Oliver is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of high success and high participation during math lessons. He also enjoys riding his bike.

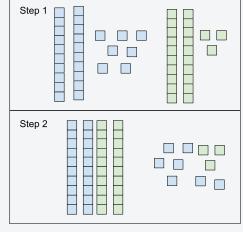

Valentina (she/her)

Valentina is a Latina girl who speaks English as her first language. She has an IEP for language. He is on an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. a history of high success and She has a history of average success and low participation during math lessons. She also singing. enjoys spending time in nature.

Mason (he/him)

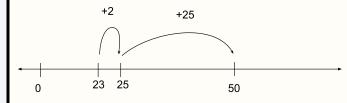

Mason is a white boy who speaks English as his first severe ADHD. He receives free or reduced lunch. He has low participation during math lessons. He also enjoys

Strategy C

- 1. I made 27 and 23 with the blocks.
- 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, which is 50

Strategy D

- I started at 23.
- Then I took 2 from the 27 to make a jump of 2.
- That makes 25.
- Then I only needed to add 25 more, so I made another jump and got 50.

Alejandro (he/him) Grace (she/her) Carter (he/him) Liam (he/him) Grace is an Asian girl who Carter is a Black boy who Alejandro is a Latino boy who Liam is a white boy who speaks English as her first speaks English as his first speaks Spanish as his first speaks English as his first language. She has an IEP for language. He has no language. He is an EL student language. He has no dyslexia. She does not identified disabilities, and he who speaks English at a identified disabilities, and he receive free or reduced lunch. receives free or reduced beginner level. He has no does not receive free or She has a history of low lunch. He has a history of identified disabilities. He reduced lunch. He has a receives free or reduced success and average average success and little to history of average success and average participation participation during math no participation during math lunch. He has a history of low lessons. She also plays lessons. He also loves to cook success and low participation during math lessons. He also basketball. and bake. during math lessons. He also loves comic books. loves to play Minecraft. Strategy F Strategy E • First, I added 7 and 3 27 to get 10. I put a zero 23 + 27 + 23 under the 7. I made it 23 + 27 because that's easier for 50 • Then I put the 1 up me to think about. 23 + (2 + 25)Then I broke the 27 into 2 and 25. above the 2. Last I (23 + 2) = 25Then I combined the 2 with the 23, and I got added 1 + 2 + 2 to get 50. Camille (she/her) Daniela (she/her) CJ (they/them) Ava (she/her) CJ is a gender fluid white Camille is a white girl who Daniela is a Latina girl who Ava is a white girl who speaks English as her first language. speaks French as her first speaks English as her first child who speaks English as language. She is an EL language. She has no their first language. They have She has no identified student who speaks English identified disabilities, and she no identified disabilities, and disabilities. She receives free they do not receive free or at an advanced level. She has does not receive free or or reduced lunch. She has a no identified disabilities, and reduced lunch. She has a reduced lunch. They have a history of low success and low she does not receive free or history of average success history of high success and participation during math reduced lunch. She has a and low participation during average participation during lessons. She also loves math lessons. She also loves math lessons. They also love history of high success and gardening. high participation during math to dance. to draw and paint. lessons. She also does karate. Strategy G Strategy H 1. 1. I made 27 and 23 with the blocks. 2. I pulled 2 apart from the 27 to make 25. 3. I put the 2 with the 23 to make 25. That makes 25 27 + 23• First I added 20 and 20 to get 40. + 25 which is 50. Then I added 7 and 3 to get 10. 20 + 20 = 40• Then I added 40 and 10 to get 50. 7 + 3 = 1040 + 10 = 50
