CODE: 185

Background

Imagine you are teaching a math lesson to a class of 16 second grade students. The purpose of this lesson is to examine the ways properties of operations can be used to add numbers.

You have asked the students to work with a partner to solve the problem 27 + 23 using any method that works best for them. The partners have completed their work. Now you plan to select 3 individual students to present their work to the class.

Look at the strategies below and the descriptions of the students. Then choose which three students you would like to have present.

The Problem

27 + 23

Learning Goal

Your goal is for the students to be able to understand how properties of operation can be used to add numbers.

- · You want the students to understand that two numbers can be added in any order (commutative property).
 - Example: 3 + 4 = 4 + 3
- You also want the students to understand that 3 numbers can be regrouped and added in any order (associative property).
 - \cdot Example: 9 + (1 + 7) = (9 + 1) + 7

2nd Grade Student Descriptions Oliver (he/him) Jada (she/her) Daniela (she/her) Adriel (he/him) Oliver is a white boy who Jada is a Black girl who Daniela is a Latina girl who Adriel is an Indigenous boy speaks English as her first speaks English as his first speaks English as her first who speaks English as his language. He has no language. She has no language. She has no first language. He has no identified disabilities, and he identified disabilities, and she identified disabilities, and she identified disabilities, and he does not receive free or does not receive free or does not receive free or receives free or reduced reduced lunch. She has a reduced lunch. He has a reduced lunch. She has a lunch. He has a history of history of high success and history of high success and history of average success average success and low high participation during math high participation during math and low participation during participation during math lessons. He also enjoys riding !lessons. She also plays on a math lessons. She also loves lessons. He also loves to play soccer. his bike. softball team. to dance. Strategy A Strategy B 27 + 23• I broke the 27 into 25 and 2. • First I added 20 and 20 to get 40. Then I added the 2 and 23 to make 25. Then I added 3 more to get 43. 25 + 2Then I knew that 25 plus 25 is 50 because 2 quarters are 50 cents. 40 25 40 + 3 = 4325 + 2550 CJ (they/them) Alejandro (he/him) Mateo (he/him) Camille (she/her) Mateo is a Latino boy who Camille is a white girl who CJ is a gender fluid white Alejandro is a Latino boy who child who speaks English as speaks Spanish as his first speaks Spanish as his first speaks French as her first their first language. They have language. He is an EL student language. He is an EL student language. She is an EL no identified disabilities, and who speaks English at a who speaks English at an student who speaks English they do not receive free or beginner level. He has no intermediate level. He has no at an advanced level. She has reduced lunch. They have a identified disabilities. He identified disabilities. He no identified disabilities, and history of high success and receives free or reduced receives free or reduced she does not receive free or average participation during lunch. He has a history of low lunch. He has a history of high reduced lunch. She has a math lessons. They also love success and low participation success and average history of high success and to draw and paint. during math lessons. He also participation during math high participation during math loves to play Minecraft. lessons. He also likes to play lessons. She also does the guitar. karate. Strategy D Strategy C +2 Step 1 1. I made 27 and 23 +25 with the blocks. 2. I combined the tens together. Then I combined the ones. That's 4 tens, which is 40. Plus 10 ones, 23 0 50 which is 50.

Step 2

I started at 23.

and got 50.

That makes 25.

Then I took 2 from the 27 to make a jump of 2.

Then I only needed to add 25 more, so I made another jump

Carter (he/him)	Liam (he/him)	Mason (he/him)	Grace (she/her)
Carter is a Black boy who speaks English as his first language. He has no identified disabilities, and he receives free or reduced lunch. He has a history of average success and little to no participation during math lessons. He also loves to cook and bake. Strategy E	Liam is a white boy who speaks English as his first language. He has no identified disabilities, and he does not receive free or reduced lunch. He has a history of average success and average participation during math lessons. He also loves comic books.	Mason is a white boy who speaks English as his first language. He is on an IEP for severe ADHD. He receives free or reduced lunch. He has a history of high success and low participation during math lessons. He also enjoys singing.	Grace is an Asian girl who speaks English as her first language. She has an IEP for dyslexia. She does not receive free or reduced lunch. She has a history of low success and average participation during math lessons. She also plays basketball.
23 + 27 23 + (2 + 25) (23 + 2) = 25 • I made it 23 + 27 because that's easier for me to think about. • Then I broke the 27 into 2 and 25. • Then I combined the 2 with the 23, and I got 25.		First, I added 7 and 3 to get 10. I put a zero under the 7. Then I put the 1 up above the 2. Last I added 1 + 2 + 2 to get 50.	
Ava (she/her)	Jackie (she/they)	Angel (she/her)	Valentina (she/her)
Ava is a white girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced lunch. She has a history of low success and low participation during math lessons. She also loves gardening.	girl who speaks English as her first language. She has no identified disabilities. She receives free or reduced	Angel is a Black girl who speaks English as her first language. She has no identified disabilities, and she does not receive free or reduced lunch. She has a history of low success and low participation during math lessons. She also enjoys making origami.	Valentina is a Latina girl who speaks English as her first language. She has an IEP for speech impairment (stuttering). She does not receive free or reduced lunch. She has a history of average success and low participation during math lessons. She also enjoys spending time in nature.
Strategy G		Strategy H	
1.	 I made 27 and 23 with the blocks. I pulled 2 apart from the 27 to make 25. I put the 2 with the 23 to make 25. That makes 25 + 25 which is 50. 	27 + 23 • First I added 20 and 20 to get 40. 20 + 20 = 40 • Then I added 7 and 3 to get 10. • Then I added 40 and 10 to get 50.	
2.		40 + 10 = 50	
3.
